EDUCATION

Programming Education with JavaScript Software University (SoftUni)

01/2020 - 10/2022

Courses

- Programing Basics
- JS Advanced
- HTML & CSS
- Programing Fundamentals
- JS Aplication
- ReactJS

Master's degree of Computer Systems and Technologies

Technical University of Gabrovo

09/2021 - Present

SKILLS

JavaScript

TypeScript

React

Redux

HTML

CSS

Bootstrap

MaterialUI

Git

PERSONAL PROJECTS

Who wants to be a Millionaire

- Who wants to be a Millionaire is a web-based quiz game built using React and TypeScript. It utilizes Redux Toolkit and Redux-Persist for managing the state and persisting data, while React Router handles navigation within the application. The user interface is designed to be clean and responsive, achieved through the use of Bootstrap for styling.

Online Shop

- Online shop that enables users to create an account and log in. Products page displays all products from different categories with option for search a product by specific keyword. Users can add products to their cart and after that edit selected products or purchase them. The categories page makes it easy for users to find products by category.

Beer App

- React-based application that displays a list of beers which includes an image and a short description about. Users can select their favorite beers and create own list of favorite beers. Application allows users to search for beers by specific keywords. Another interesting feature is the ability to generate a random beer and view its details.

Portfolio

- This is my personal portfolio project built using React and Material-UI. It showcases my skills, projects, and contact information in a user-friendly interface.
